

## **Online payments coming soon!**

The Limestone District School Board is introducing a new online system to make the process of providing permission and paying for school-related events and activities timelier and more efficient.

We are pleased to share that our school is one of several in the Limestone District School Board to launch this new secure online portal that will allow families to complete payments and permission forms from any web browser.

How does this new system work? Parents and guardians will be invited via email to view their student's events and activities. This might include events such as field trips and sporting events or activities such as hot lunch and yearbook purchases. Parents/guardians will then be asked to complete the required permissions and complete payment (if applicable) via credit card or electronic funds transfer from their bank account.

All transactions will be completed via a secure portal that requires the use of a unique key code for each student that is specific to each parent/guardian. Instructions on how to register for this new system will be shared once the system goes live in April 2020.

The new portal will remove the risks associated with sending money to school with students, the frustration of lost or missing permission forms, and significantly reduce the amount of paper our school consumes.

We are excited to offer our families this efficient and convenient tool. As with the introduction of any new system, we appreciate your understanding and patience as we move forward.

Please contact the school if you have any questions.
